Summary

Computer Science and Engineering undergraduate with internship experience in full-stack development and backend systems. Strong foundation in programming, problem-solving, database design, and software development, with hands-on experience building secure, scalable and reliable web applications.

Education

NMAM Institute of Technology — Nitte, Karnataka
Bachelor of Technology in Computer Science and Engineering | CGPA: 8.78/10 — *Aug 2023 – Present*

Vidyodaya Pre-University College — Udupi, Karnataka
Pre-University Education | 94.5% — *Aug 2021 – May 2023*

Experience

Full Stack Development Intern — Nov 2025 – Jan 2026
ALGOORBIT Innovations Private Limited — *Remote*

- Delivered course management and student progress-tracking capabilities for a MERN-based EdTech platform serving 100+ registered users
- Established role-based authorization across admin, instructor, and student workflows to control access to application features
- Optimized MongoDB aggregation pipelines and introduced indexes for high-frequency operations, reducing average API response time by ∼25%
- Engineered Express.js backend services with structured input validation and centralized error handling to improve API reliability

Projects

School ERP | *React.js, Node.js, Express.js, PostgreSQL, Prisma* — Jun 2026 – Aug 2026

- Created a school management platform supporting academic and administrative workflows for students, faculty, parents, and staff
- Architected role-based authorization across five user categories spanning academic, administrative, and parent-facing functionality
- Added subjective-answer evaluation using text-similarity scoring to compare student responses against expected answers
- Modeled the PostgreSQL data layer with Prisma, defining 53 models and 17 indexes to support academic and administrative operations

LinkScope | *React.js, NestJS, TypeScript, PostgreSQL, Prisma, Redis, Docker* — Apr 2026 – Aug 2026

- Architected a multi-tenant URL-shortening SaaS for organization-level link management and click analytics
- Enforced tenant isolation at the data-access layer using Prisma, preventing unauthorized cross-organization access to URLs, users, and analytics
- Strengthened authentication and authorization with session-token rotation and permission controls for protected resources
- Leveraged Redis for short-link caching and asynchronous click-event processing, while containerizing PostgreSQL and Redis with Docker for reproducible development

Technical Skills

Languages: Python, C++, JavaScript, TypeScript, HTML/CSS
Frameworks & Libraries: React.js, Node.js, Express.js, NestJS, Prisma
Databases: PostgreSQL, MongoDB, MySQL
Developer Tools: Git, GitHub, Docker, Postman
